Professional Engineer – Missouri & Kansas
Professional Traffic Operation Engineer (PTOE)

PROFESSIONAL MEMBERSHIPS

KCITE (Vice President), ITE, MoVITE, APWA, ITS Heartland

STATEMENT

Serving the KCITE Membership as Vice-President this past year has been an enriching experience. I have helped with the launch of the StarChapter website to better serve the membership, the Spring MoVITE conference in Kansas City, led the arrangements committee and been part of the 10 year KCITE anniversary. KCITE has provided me a venue to build relationships with other transportation professionals as well as increase my knowledge and resources in transportation engineering. I wish to continue to build upon the work I have put into the organization which I have benefited from the last several years. I will work to continue the high standard of programming that has been presented to the membership and work with MoVITE and other chapters within the MoVITE district to share ideas on how to continuously improve our chapter. I appreciate your support, and look forward to serving as President of KCITE for 2014.
