Professional Engineer- Kansas 2000, Missouri 2001

PROFESSIONAL MEMBERSHIPS & PARTICIPATION

KCITE, APWA (member of National UPROW Damage Prevention subcommittee), ACEC-Kansas

STATEMENT

I have been participating in KCITE activities since at least 2007. I have been a member of the Training Committee in the past, and am currently serving on the Arrangements Committee (you may have seen me at the registration table). KCITE greatly benefits transportation professionals by:

- Providing continuing education and training opportunities that are convenient and affordable
- Facilitating public policy discussions and providing professional input to decision-makers
- Promoting ways to give back to our local community and promote STEM opportunities to new generations
- Allowing folks from the public and private sector to interact in a “low pressure” setting

My focus as Member Director will be to continue to support these important benefits to KCITE members, build participation in our local chapter, and seek additional ways to improve our profession and our community.
