Vice President - 2017

Statement

Serving on the KCITE board for the past 3 years has been a very gratifying experience for me. It is my hope that I can continue that service as your 2018 KCITE President. This past year, as Vice President, I had the opportunity to chair the arrangements committee in selecting topics, venues and of course food for the 2017 Chapter Meetings. We have tried new ways to streamline the check in process and hope that you saw some improvement. As President I intend to support & lead the incoming board in continuing to foster an environment within KCITE where our members benefit through training and networking, improving partnerships by hosting joint meetings and ensuring all of our membership has access and knowledge of the exciting things that are happening in our region. I am passionate about keeping Kansas City at the forefront of new transportation practices and technologies; and look forward to serving KCITE and you if afforded that opportunity.
