Jeremy Stretz, PE, PTOE, RSPL1
KSITE Member Director Candidate

EDUCATION

Bachelors of Science, Civil Engineering, 2011
University of Missouri, Columbia

PROFESSIONAL REGISTRATIONS

Professional Engineer: Missouri, Kansas, Texas
Professional Traffic Operations Engineer (2016)
Road Safety Professional, Level 1 (2019)

WORK EXPERIENCE

Project Engineer, Olsson 2011-Current
Specializing in Traffic Engineering and
Technology Projects

PROFESSIONAL MEMBERSHIPS

ITE, KSITE, MoVITE, ITS Heartland

STATEMENT

Thank you for your consideration to be a larger part of this great organization as Member Director. I was very fortunate to have been introduced to the organization very early in my career by one of my mentors, and a KSITE past president, Shannon Jeffries, who brought me along to meetings as an intern with Olsson. Through that relationship, I found what it meant to be a part of the organization and have respected the opportunities KSITE provides to members as an outlet which fosters professional growth, knowledge, leadership, and networking opportunities.

I was able to serve on the Arrangements Committee 2014-2015 and Training Committee 2016-2017 which allowed me the chance to organize meetings and trainings for the KSITE membership group. As a part of these committees I enjoyed planning and executing new and exciting discussion forums, providing area members a platform to educate as well as opportunities for members to expand their knowledge on industry practice.

As our practice is currently in a state of growth and change, thanks to the data rich environment, I want to be part of our KSITE organization which continues to grow and develop area experts by looking at the next generation of problems and solutions while continuing education on foundational traffic engineering practices.
