- Arrangements Committee 2021-2022
- Young Member Committee 2022-Present

ITS Heartland

- Member since 2024
- Consultant Director 2026-2027

I was introduced to KSITE within the first year of my full-time career, having just moved to Kansas City. I quickly joined the Arrangements Committee to get more involved and start understanding how the organization works, and when the board started working on the idea of dedicating outreach to younger members in 2022, I volunteered to lead the effort. Founding the KSITE Young Member Committee has helped me to grow professionally and personally.

As a board member, I would draw on my experience from establishing the Young Member Committee to help grow KSITE membership at every career stage and strengthen engagement. KSITE is a valuable resource for all transportation professionals to build their technical knowledge, expand their professional network, and grow their passion for the field.
