Member Kansas Drive to Zero Safer People Task Force

Road Safety Champion, Planning and Engineering

Narrative

Throughout my career I have had the opportunity to work in both public and private roles to advance roadway safety and better communities. I currently lead KDOT's Access Management Unit with a focus on transportation engineering, corridor planning, access permitting, and coordination. The mission of the unit is to manage state highway access and create transportation corridors that reasonably balance safety, efficiency, and economic activity. I think it is a great mission and something I am proud to help deliver to the public.

I appreciate the role that ITE, MoVITE, and KSITE play in working to improve mobility and safety for all transportation system users through their advocacy for the industry, the professionals that serve in the industry, the education, the research and ultimately the community we help to create. It is a great cause and something I have supported for many years.

It is an honor to be considered in a role that allows me to continue to support that great cause with KSITE as the Treasurer – Secretary. Thank you for the support from our members and fellow board members. I am looking forward to the opportunity to serve you in 2027.
